

Entrust Corporate Profile

Identity-Based Security

As a trusted security expert, Entrust provides comprehensive identity-based security solutions that safeguard enterprises, governments, financial institutions, citizens and websites.

More than 5,000 organizations in 85 countries across the globe leverage Entrust's world-class security solutions, which include strong authentication, physical and logical access, public key infrastructure (PKI), cloud and mobile security, citizen eID, employee credentialing, SSL and more.

Trust in identities. Security begins when organizations know and trust the identity of those involved in a given transaction. However, the story of identity no longer solely focuses on individual people — increasingly, it's about devices and applications — ranging from personal mobile devices to ATMs and even electrical meters.

Cloud security. With more than a decade of experience providing hosted services for the world's top organizations, Entrust understands the critical need of securing identities both for and in the cloud.

To ensure enterprises' safe migration to cloud services and applications, Entrust offers a single software platform that provides identity federation, strong authentication, a full range of mobile capabilities and key self-service tools. And our comprehensive digital certificate portfolio and management services help secure Web-based platforms and environments that make cloud computing possible.

Global respect. Elite organizations and government agencies — INTERPOL, U.S. Department of State, NASA, U.K. Ministry of Defence, Bank of New Zealand, Banco Santander, DnB NOR, Lloyds TSB, American Airlines, Pfizer, Expedia and more — look to Entrust to help protect and secure the most sensitive of assets.

Identity-Based Security Solutions

Entrust's versatile identity-based security solutions can be tailored to protect digital identities and information at multiple points to address ever-evolving threats to physical, logical and mobile environments.

As organizations seek stronger, cost-effective security solutions, Entrust is able to deliver a proven product portfolio that is easy to use, quick to deploy, and seamlessly provides security within the enterprise and protects the digital identities of consumers and citizens from online fraud.

Strong Authentication

Entrust offers a comprehensive software-based authentication platform, including certificate-based authentication capabilities, which allow organizations to set stronger standards for physical, logical and mobile access.

What we do

Entrust provides identity-based security solutions for enterprises, governments, and financial institutions that:

- Protect digital identities through strong authentication of people, devices and applications
- Leverage mobile devices as smart credentials, convenient authenticators or to enable mobile security applications
- Provide software solutions to authenticate identities to the cloud and cloud-based applications
- Offer a combination of physical, logical and mobile authentication solutions via a single platform
- Simplify issuance and management of smartcards
- Enable governments to deploy advanced credentialing and citizen eID borders projects
- Safeguard vital proprietary assets through encryption
- Instill trust in Web transactions via Entrust Certificate Services, the No. 2 SSL vendor per Frost & Sullivan

Who we secure

- 9 of the top 10 e-governments worldwide
- 8 of the top 10 global telecom companies
- 8 of the top 10 global aerospace and defense companies
- 7 of the top 10 global commercial banks
- 7 of the top 10 global pharmaceutical companies
- 4 of the top 5 global petroleum companies

Entrust IdentityGuard is an award-winning software-based authentication platform which includes the broadest range of authenticators on the market. It offers cost-effective authentication solutions for wide-scale deployment to a spectrum of user groups ranging from a select number of employees to millions of customers.

The platform sets a new standard for physical and logical access control by also seamlessly integrating card and certificate management. Entrust IdentityGuard addresses the growing number of personal mobile devices used in business by offering the only authentication platform to fully enable today's leading mobile platforms. Additional products include:

- **Entrust IdentityGuard Mobile:** A family of identity applications that leverage today's popular mobile devices for greater security, including transaction verification, one-time-passcode (OTP) authentication and embedded mobile application security, plus the convenience of NFC and Bluetooth compatibility
- **Entrust Smart Credentialing:** End-to-end service provides multipurpose smartcards for enterprise, citizen and government environments
- **Entrust TransactionGuard:** For real-time, zero-touch fraud detection

Public Key Infrastructure & Digital Certificates

A pioneer of public key infrastructure (PKI), Entrust offers customers flexible and manageable solutions that leverage the unparalleled security capabilities of PKI — delivered as software or as a cost-effective, hands-off hosted service.

- **Entrust Authority:** The world's first PKI solution
- **Entrust Managed Services PKI:** For a cost-effective, hosted PKI
- **Entrust Certificate Services:** Certificate discovery and management for SSL, EV SSL, UC, Adobe CDS, code-signing

From secure email, network folder encryption, ePassport security, government credentialing projects, strong authentication and digital signatures, PKI-based technology represents a collection of the most valuable solutions Entrust implements for customers across the globe.

Market & Technology Leadership

Entrust has more than 125 patents granted or pending and has received numerous awards for superior quality and performance. We are active in the development of leading security technology standards supporting interoperability and compliance in the Entrust product portfolios.

A Thoma Bravo Company

Entrust is backed by Thoma Bravo, a leading private equity investment firm that has been providing equity and strategic support to experienced management teams building growing companies for more than 28 years.

Entrust, like each of Thoma Bravo's software portfolio companies, operates independently. Entrust works in close partnership with Thoma Bravo to enhance organic growth, increase market share, and provide strong products and services.
